Product Manager & Product Owner - Enterprise Stakeholder & Cross-Functional Team Leadership | Requirements & Business Analysis | Turned a 10% Failure Rate into 0% | Proven Across Telecom & Software Platforms

Product Strategy & Backlog Ownership | Requirements & Functional Analysis | UX & Customer Experience | Agile / Scrum Delivery | Domain-Adaptable Across Industries

PROFESSIONAL SUMMARY

Product Manager and Product Owner with 10+ years leading enterprise software products across telecom and hospitality-tech - proof that my core strengths (stakeholder alignment, cross-functional engineering leadership, and translating ambiguous problems into scalable solutions) transfer across industries, not just one vertical. My product work is grounded in strong requirements and functional analysis - translating business, customer, and regulatory needs into functional specifications, user stories, and acceptance criteria that guide engineering delivery. Built the Kitchen Display System that eliminated lost orders (10% to 0%) and led enterprise rollouts for Pizza Hut (15+ locations), City Grill (40+), Burger King Hungary (50+), and Subway France (400+) - partnering with senior stakeholders across 4 countries to turn complex operational problems into scalable, adopted product solutions.

CORE COMPETENCIES

Product Strategy | Product Discovery | Product Roadmap | Product Lifecycle | Product Requirements | Requirements Gathering & Analysis | Functional Specifications | Business Process Analysis | System Integration Analysis | Regulatory / Compliance Requirements | User Story Writing | Backlog Management & Prioritization | Sprint Planning & Refinement | User Research | UX / Customer Experience | Customer Journey Optimization | Agile / Scrum | Stakeholder Management | Product Analytics | Acceptance Testing / UAT | Definition of Done | Go-to-Market | Conversion Optimization | KPI-Driven Decision Making | AI-Enabled Workflow Automation | Cross-Functional Leadership

Industries: Telecom | Enterprise SaaS | Hospitality & Retail Tech

Tools & Platforms: Jira | Claude (Anthropic) | Codex (OpenAI)

SELECTED PRODUCT IMPACT

- **KDS turnaround:** Built an enterprise Kitchen Display System that eliminated operational gaps, reducing lost restaurant orders from 10% to 0%.
- **Regulatory compliance:** Led the requirements analysis and functional certification of the POS platform for the French fiscal market (NF525 anti-fraud legislation), translating legal requirements into functional specifications and coordinating with technical teams and certification auditors to achieve compliance.
- **Breeze POS launch:** Led the redesign and international launch of the Breeze POS platform across Romania, Bulgaria, Hungary, and France, reaching 40% adoption among target restaurants within 12 months.
- **Enterprise delivery:** Delivered B2B software products adopted by multi-national enterprise clients - Pizza Hut, City Grill, Burger King (Hungary), Subway (France) - supporting 500+ locations and processing approximately 500K transactions per month across delivery management, eCommerce, kiosk, and loyalty systems.
- **Contactless ordering:** Built a white-label QR table-ordering experience adopted by 40+ establishments and embedded in the Adobe Life application, increasing average order value by 17%.
- **Market growth:** Helped grow mobile internet demand by 30% year-over-year and secured multi-million-euro voice and SMS interconnection agreements at Vodafone Romania.

PROFESSIONAL EXPERIENCE

Bit-soft | Product Manager & Product Owner, Digital Products | 2016 - 2026

Bit Soft - a Bucharest-based enterprise software company (est. 1994) building POS, KDS, eCommerce, delivery, and PMS platforms for 1,500+ B2B clients across Romania and international markets.

- **Kitchen operations analysis:** Mapped restaurant floor and kitchen workflows to identify the root causes of order loss, then redesigned the operational flow across the restaurant - how orders were routed to the kitchen, how kitchen staff coordinated tasks, and how front-of-house and kitchen teams synchronized service - defining the functional requirements and UAT plan for the Kitchen Display System that made service delivery more efficient.
- **NF525 certification:** Analyzed French fiscal legislation, documented functional specifications and test scenarios, and coordinated with technical teams and independent auditors through the certification process.
- **Product strategy:** Set product vision and roadmap for eCommerce, delivery, mobile app, and kiosk products across 4 markets (Romania, Bulgaria, Hungary, and France), prioritizing initiatives by customer value, business impact, and delivery effort.
- **Backlog ownership:** Owned and prioritized the Breeze POS product backlog end-to-end - writing user stories, acceptance criteria, and definition of done, and running refinement and sprint planning with a dedicated Scrum team.
- **Cross-functional delivery:** Led Scrum ceremonies and execution across 4 cross-functional squads (each with 3-6 engineers, a designer, and 2 testers), removing blockers and protecting scope, quality, and release readiness.
- **Discovery & requirements:** Translated customer pain points and business/legal requirements into clear functional specifications, user stories, journeys, and acceptance criteria, cutting requirements rework/back-and-forth by roughly 80%.
- **AI-enabled productivity:** Paired Jira with AI tools (Claude, Codex) to accelerate story writing, documentation, and product configuration, cutting time spent on these tasks by roughly 50-70%.

Telcor Communications | Product Owner / Product Manager | 2014 - 2016

Led the end-to-end lifecycle for web and mobile products, partnering with clients and technical teams to gather, prioritize, and translate requirements into solutions aligned with strategic account goals.

Concept Apps Development | COO & Product Manager | 2014

Directed software and mobile app delivery, advising clients on product decisions and priorities, and designed optimized UX flows that simplified complex use cases.

Simplus Invest | Manager, New Business | 2013 - 2014

Evaluated new service concepts through market analysis and financial modeling, and coordinated go-to-market execution and commercial partnerships.

Vodafone Romania | Product Manager (Marketing & Mobile Internet) | 2007 - 2013

Launched mobile data commerce products (parking, transport, cinema payments) based on structured requirements analysis; grew mobile internet demand by 30% YoY.

Vodafone Romania | Project Manager (Marketing, Consumer VAS) | 2006 - 2007

Served as business-to-technical SPOC for mobile internet initiatives, translating business requirements into clear execution plans, and led performance reporting for Value-Added Services.

Vodafone Romania | Interconnection Specialist | 2004 - 2006

Negotiated and maintained telecom interconnection contracts, analyzing technical and commercial requirements; monitored traffic patterns to mitigate fraud and abuse risk; secured multi-million-euro voice/SMS interconnection agreements, averaging up to two signed contracts per month.

Romania Data Systems (RDS) | Business Development Assistant | 2002 - 2004

Managed infrastructure development projects and investment budgets for regional branches; maintained relationships with national telecom regulators.

EDUCATION

- Bachelor of Economics in Management, Department of Management, IASI, Faculty of Economics and Business Administration (1995 - 1999)
- Mathematics and Physics Science Class, "Alexandru cel Bun" College of Gura Humorului (1991 - 1995)
